Innovating for good:
My experiments as a 12-year old innovator

 braigoLabs™

My Journey of discovery started in 2014 @ Age 12
A "kid" had to step in because all of us failed to be an inclusive society

Now @ Age 17

STUDENT BY PROFESSION | INNOVATOR BY CHANCE | ENTREPRENEUR BY CHOICE

COMPANY

TRAVEL

COMMITMENTS

HIGH SCHOOL SENIOR

VARSITY QB

STUDIES , STUDIES

COLLEGE APPLICANT

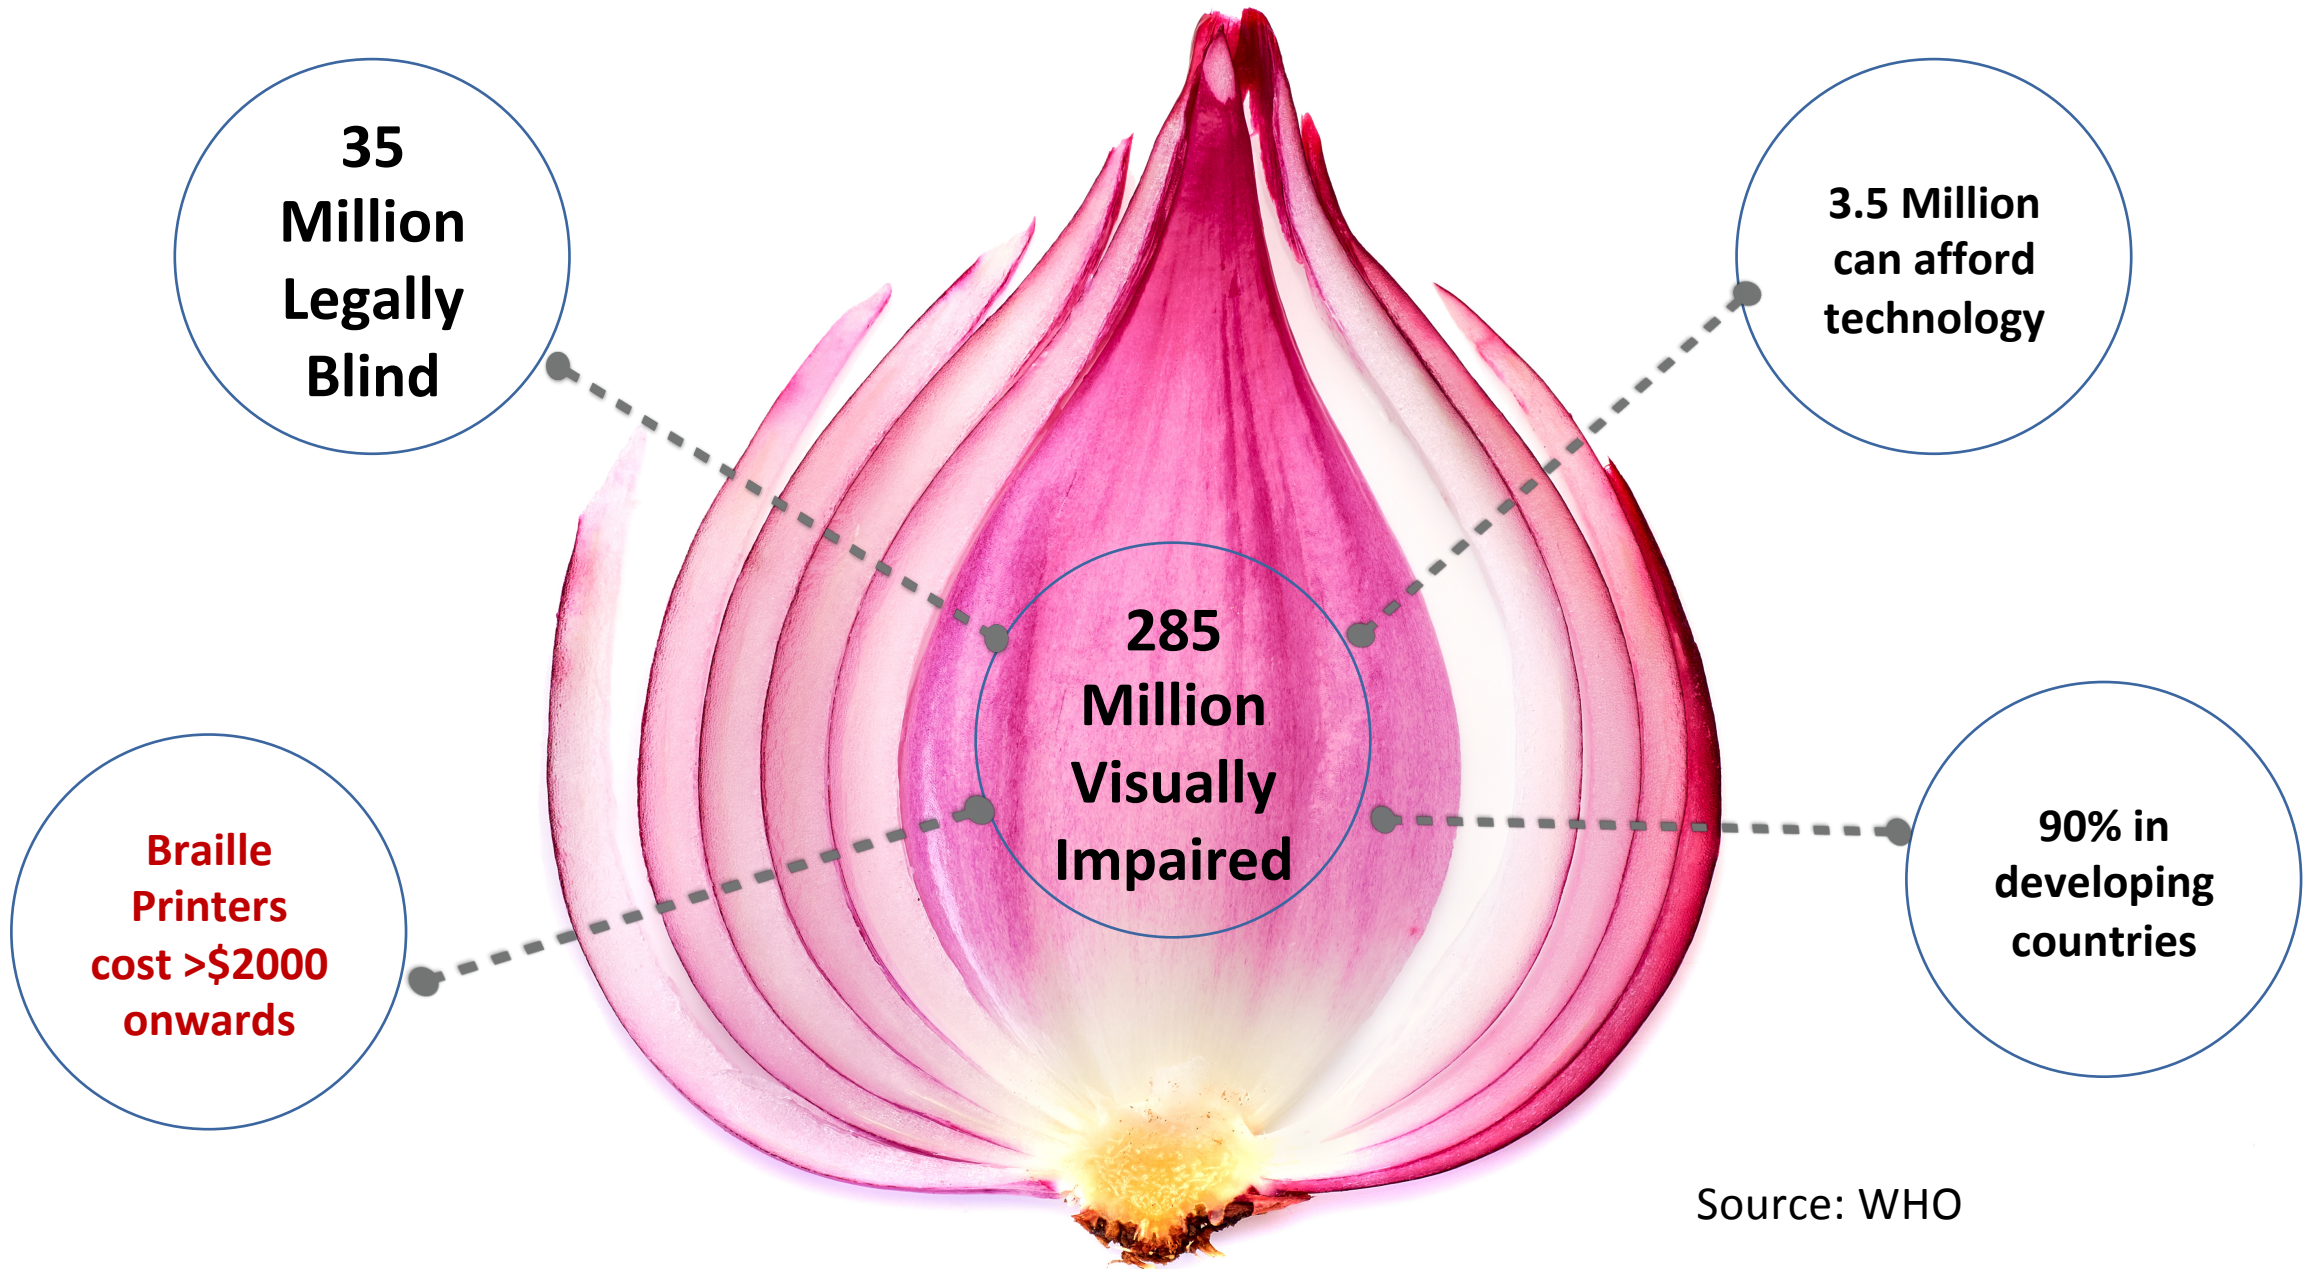

My journey started with a question to my parents “How do Blind People Read?” and their response

I don't know,
Google it.

-Year 2013 - December

I opened a box that was
enlightening and at the
same time saddening

Reimagine the future
Innovation for **every** child

We simply failed to be
INCLUSIVE in our
innovation approach

And it all started with a smart toy

- Lego was fun for me
- I could tinker at home
- Now I know the concept works after one month of effort

Why are Braille Printers so costly?

BRAIGO 1.0 – “Braille” + “Lego”

Jan 2014

Braigo one pager concept

What you need to build Braigo

\$349

LEGO MINDSTORMS EV3

+

\$9 +

\$5

+

\$2

+

A PC/Mac to program BRAIGO

Braille Concept

The brail language comprises of 6 dots - 2 x 3

The BRAIGO printer is positioned to print in 3x2 format

for example

= A in English vertically

= A in English horizontally

when you print - the pin makes a hole from the top of the paper so the Letter A horizontally has to be printed as a mirror image from top

At the end of this presentation you will have reference for all the letters

A	I	Q	Y	4
B	J	R	Z	5
C	K	S		6
D	L	T	#	7
E	M	U	0	8
F	N	V	1	9
G	O	W	2	
H	P	X	3	

Design of movements

Movements of the head or paper

Punching of holes

Life as I knew it, changed – not only for me but my family

First ever White House
Maker Fair hosted by
President Barak Obama in
June 2014

Lego Mindstorms Maker Team – They Treat me so
well and make me feel that I am one of their own

Meeting Inspirational People

Dale Daugherty – The founder of Maker Fair
Soren Torp Laursen – Lego President
And of-course Bill Nye (The Science Guy)

Opened up a new idea #BotsforGood

Many loved the idea that I tried to build something that will help someone else

A large, irregular blue ink splatter is centered on a white background. The splatter has a textured, painterly appearance with some darker blue and greyish-blue tones at its edges. The text "I started something unique, but I can't stop now" is written in a white, sans-serif font across the middle of the blue area. The text is arranged in three lines: "I started something", "unique, but I can't", and "stop now".

I started something
unique, but I can't
stop now

My Dad became my angel investor. I needed money, I told him to take it from my college fund. *Well he took it out from his retirement fund.*
September 2014

A new kind of Braille Printer @IDF 2014

- Almost Silent
- Low Cost
- On Chip conversion of Braille –
No extra Software needed
- Portable
- Connected Printer

Braigo launches web app to help blind people parse text on images

Haje Jan Kamps 2 years ago

Comment

The internet is all about sharing information, but a lot of the information shared assumes that its users are able to rely on their senses to consume said information.

For example, in the case, and for the more than 285 million people around the world who are visually impaired, browsing the 'net can be a less than fruitful

EDUCATION

Why Did Intel Quit the Science Fair?

It may have found something shinier.

HANA SCHANK OCT 13, 2015

Shubham Banerjee invented a low-cost machine to print Braille and brought it to Maker Faire, a new Intel investment. (MARCIO JOSE SANCHEZ / AP)

It may have been a summer filled with high-profile breakups, but for educators, perhaps the most shocking split came this September—not in Hollywood, but Silicon Valley—when Intel and the Science Talent Search (STS) announced they were ending their 17-year relationship. Like a jilted lover, the Society for Science & the Public announced it would be seeking new sponsorship for its high-school competition, which has effectively served as the country's

Science fairs aren't actually preparing your kids to do anything

By Jenn Choi · March 24, 2015

40+ International &
national awards and
recognitions for
Innovation later....

My school life
became
tougher

Managing my passion and
maintaining a regular school life
was a challenge.

But, I tried to balance to be a
normal teenager and expectations
from the outside world.

Key Takeaways

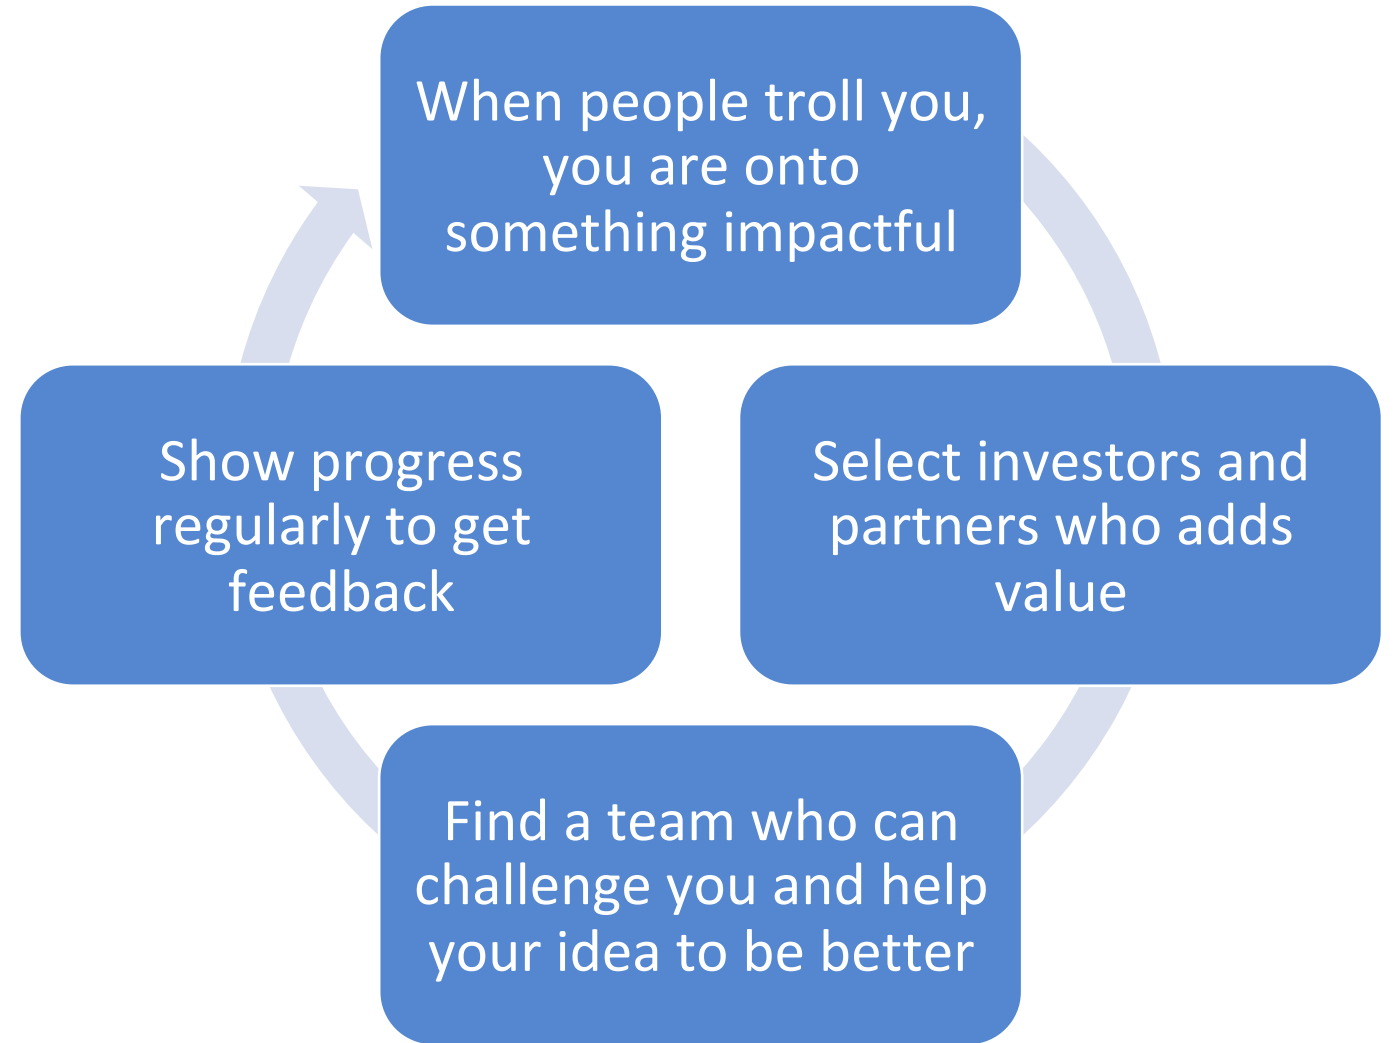

Innovate for the
right reasons ,
money is not one
of them

Technology
should help us
and not become
a burden due to
high costs

Its easy to create
a costly solution
to solve the
problem, very
difficult to find a
cheaper solution

Ego has no place,
there are always
better people out
there.

Key Takeaways

Young
Innovators
are in all
parts of the
world

Difference is , many are innovating to
survive in harsh conditions

CHALLENGE: Can you use the product YOU DESIGN with your eyes closed?

THANK YOU
